**FISCAL IMPACT STATEMENT**

**LS 7541**

**BILL NUMBER:** SB 451

**NOTE PREPARED:** Jan 30, 2009

**BILL AMENDED:** Jan 29, 2009

**SUBJECT:** Energy Savings Contracts.

**FIRST AUTHOR:** Sen. Lawson C

**FIRST SPONSOR:**

**BILL STATUS:** CR Adopted - 1<sup>st</sup> House

**FUNDS AFFECTED:** ☒ **GENERAL**  
☒ **DEDICATED**  
☐ **FEDERAL**

**IMPACT:** State & Local

**Summary of Legislation:** (Amended) *Guaranteed Energy Cost Saving Contracts:* This bill provides that the maximum term of a guaranteed energy cost savings contract or a utility efficiency program is 20 years. (Current law provides for maximum terms of ten and 15 years.)

*Design-Build Contracts:* The bill amends the statute governing local public works projects to state that a political subdivision or its agencies may: (1) participate in a utility efficiency program or may enter into a guaranteed savings contract as provided by law; and (2) enter into a design-build contract as permitted by law instead of awarding a public works contract.

*Conservation Measure:* The bill provides that a "conservation measure" includes installation of insulation in a political subdivision's facility. (Under current law, the definition of "conservation measure" includes only insulation of school facilities.)

**Effective Date:** July 1, 2009.

**Explanation of State Expenditures:** *Guaranteed Energy Cost Saving Contracts:* The bill would allow the state to fund larger energy savings projects through the use of an energy savings contract. Currently, an energy savings contract must include a guarantee from the provider that the energy cost savings and or operational cost savings from the project will meet or exceed the cost of the project not later than 10 years from the date the installation is completed. The projects could be about 2 times the size of current projects.

**Explanation of State Revenues:**

**Explanation of Local Expenditures:** (Revised) *Guaranteed Energy Cost Saving Contracts:* The bill would allow local units to fund larger energy savings projects through the use of an energy savings contract or participate in a utility efficiency program. Currently, an energy savings contract must include a guarantee from the provider that the energy cost savings and or operational cost savings from the project will meet or exceed the cost of the project not later than 15 years from the date the installation is completed. The energy savings projects or energy contracts relating to the alteration of water or wastewater could be about 1 1/3 times the size of current projects, and other efficiency programs could be about 2 times the size of current programs.

*Design-Build Contracts:* The bill could reduce local government public work project costs if the design-build contract was cheaper than a traditional public works project. The savings would depend on the project.

*Conservation Measure:* The impact of allowing local government to participate in a utility efficiency programs or enter into guaranteed savings contracts could also reduce locals costs. Energy savings contracts are paid from the reduction in energy costs resulting from the project.

**Explanation of Local Revenues:**

**State Agencies Affected:** All.

**Local Agencies Affected:** All.
